

Table 2. Probability and odds of a beneficial treatment effect using 12-month scores.

Outcome	Excluding Missing Data	Imputing Missing Data	
	Probability of Beneficial Effect Compared to Placebo, % (odds)	Probability of Beneficial Effect Compared to Placebo, % (odds)	Estimated Treatment Effect (95% credible interval)
Modified Rodnan skin score	90 (9:1)	94 (15.7:1)	−5.3 (−11.8, 1.3)
UCLA skin score	92 (11.5:1)	96 (24:1)	−2.5 (−5.1, 0.2)
MD global assessment	98 (49:1)	88 (7.3:1)	−0.77 (−2.00, 0.46)

UCLA: University of California Los Angeles; MD: physician.
